

Hibosome™

Hibiscus sabdariffa, commonly known as hibiscus or roselle, is highly beneficial for the skin. It is rich in antioxidants, acids, and vitamins that provide a range of skincare benefits.

INCI
Hibiscus Sabdariffa
Callus Extract

- Mild scent
- Plant based
- Water soluble

1-5%

Usage level

- 100% natural
- Vegan
- Made in the USA
- cGMP-produced

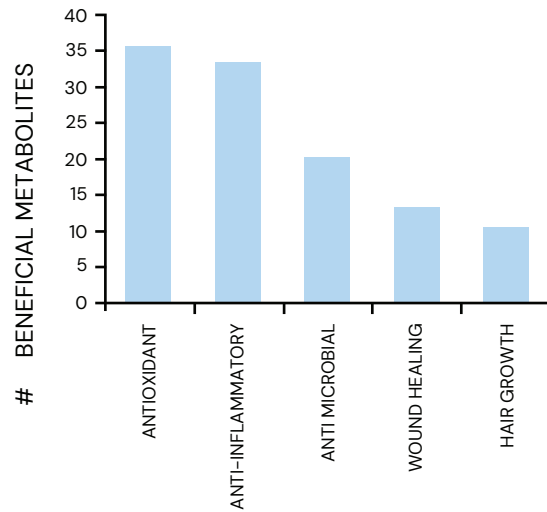

Hibosome™ is our proprietary **Hibiscus Stem Cell extract**. Our aseptic Hibosome contains numerous beneficial metabolites, such as **vitamins, polyphenols, and peptides** that have been reported to support the body's **antioxidant, anti-inflammatory, anti-microbial, and wound healing**.

Traditional Ingredients: Hyaluronic Acid, Vitamin C, Botanical Antioxidants, Spermidine, Glutathione, Pantothenic Acid

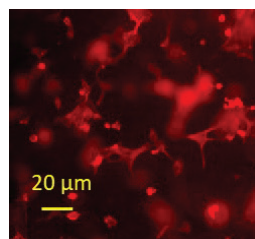

Typical Performance Profile: Traditional hydration or antioxidant ingredients typically target moisture retention or oxidative protection.

Hibosome Positioning: Hibosome contains metabolites including spermidine, glutathione, and pantothenic acid associated with skin renewal, hydration support, and antioxidant defense.

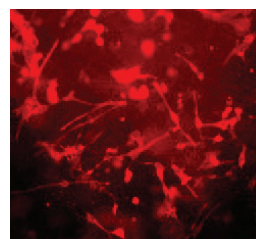

Using **metabolomics** and **AI modeling** we discovered that **Hibosome** contains numerous metabolites that were proven scientifically or clinically provide to be beneficial for the look skin and hair.

HUMAN ENDOTHELIAL CELL

HUMAN ENDOTHELIAL CELL + HIBISOME

In vitro testing showed **Hibosome** promoted formation of tube-like structures of endothelial cells. Angiogenesis assay on human microvascular endothelial cell. Red staining marks actin filaments.
